Chatham Continues to be HOT!

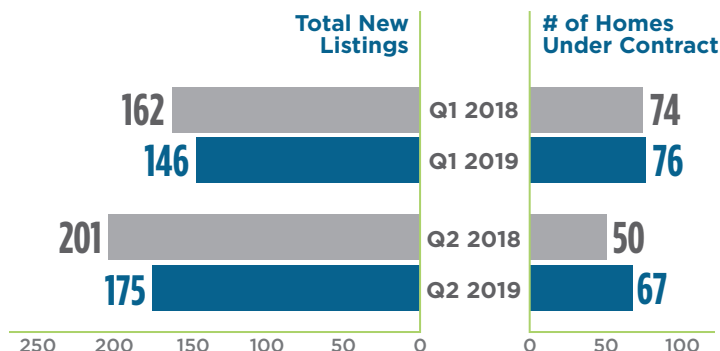

The first half of the year is in the books and the theme is clear, Chatham is still a HOT market! New inventory for the first half of 2019 decreased by 12% over 2018's first half, while the number of homes under contract increased by 15%. The near historic low interest rates and push down in prices have created an opportunity for up-sizers while the down sizers and first time buyers are vying for the same houses. Homes which have been painted, staged, and updated continue to sell the fastest. When selling, it is more important than ever to hire a hands on, experienced real estate team with a strong track record for getting top dollar. Our team of specialists are here to guide you through every step of the home prep and selling process with care and candor.

We are your to count on.
